UK EMPLOYEES

OVER  
**£4M**  
INVESTED IN  
RECENT RESEARCH  
& DEVELOPMENT

Founded in 1967, Tamlite Lighting are widely regarded as one of the most innovative and forward-thinking businesses in the lighting industry. It is amongst the largest privately-owned lighting companies in the UK, and a key example of British industry in action, with its extensive R&D and manufacturing activities managed out of nine factories in the Midlands. Last year, the company delivered over 5 million products and, as a business, it has invested more than £4 million over the last three years to undertake the development of a number of cutting-edge lighting solutions.

***Tamlite is the second largest privately owned lighting company in the UK***

Tamlite's highly skilled and knowledgeable team provides solutions across a range of industries. Regardless of the application or its complexity, there is a 100 per cent commitment to meet the exacting requirements of a particular sector or type of organisation. As the 'eyes and ears' of the company across the UK, the team's everyday dialogue and interaction with clients is vital and helps to shape Tam-lite's research and product development activities. This keeps the company at the forefront of new designs and the latest industry guidelines.

As well as its own in-house testing laboratory, Tam-lite offers the full design service that you would expect from one of the UK's largest lighting manufacturers. Despite its large size, the company has also established itself as an expert in bespoke solutions, providing an industry-leading response time from initial concept to delivery.

Tamlite Lighting are members of RELUX and DIALux, the two leading, professional lighting design software packages used by designers and architects across the world. Photometric data is also available for download on the Tam-lite web site in support of other design platforms. A product range this big needs a highly skilled and knowledgeable team of sales engineers to provide on-site advice for applications and products. Tam-lite Lighting have a 25 strong field sales force that play an important role in our Lighting Team as the eyes and ears to our company across the British Isles. Their everyday dialogue and interaction with customers is vital and helps keep Tam-lite Lighting at the forefront of new designs and the latest industry guidelines.

**RELUX®** DIALux

Tamlite Lighting have been awarded the Lighting Industry Association Quality Assurance (LIAQA) certificate against LIAQA Module 3 (Commercial Luminaires). As part of the QA process Tam-lite was also commended by the LIA for its 'commitment to quality'.

This highly robust industry-specific quality management system is regarded as a mark of confidence across the industry. The LIAQA scheme requires companies to demonstrate quality management through ISO9001 or the LIA proprietary scheme (previously the Code of Practice).

For customers, the LIAQA scheme helps to ensure best practice and provides reassurance that quality is a key component of the complete design and development process. Companies like Tam-lite who have been awarded the certification are required to implement a series of processes and procedures. Where required, improvements have to be made concerning product testing. Tam-lite has not only met all of the requirements of the LIAQA scheme, it has been praised by the LIA's QA Assessors.

**Tamlite Lighting has been recognised for its commitment to best practice, excellence and quality assurance by the Lighting Industry Association's Quality Assurance (LIAQA) Award. Tam-lite is the first company to be bestowed this prestigious annual award.**

Tamlite's win was announced at the LIA's annual luncheon in London – an event which brings together respected industry figures to celebrate the growth and successes of the lighting sector. The award acknowledges Tam-lite's exceptional support of the LIAQA scheme, a highly robust quality management system that is regarded as a mark of confidence across the industry.

## INFINITY ASSURANCE

---

Our Infinity Assurance programme is designed to give you confidence and knowledge to make the right decisions when it comes to selecting LED lighting. It is a set of 4 standards covering:

**Light Quality.** Minimum CRI: Ra>80. Colour temperature tolerances and binning: SDCM<3

**Efficacy.** Minimum performance of 80 luminaire lumens per circuit watt. Minimum power factor ratings on LED driver of 0.90.

**Warranty.** Minimum 5 years warranty for absolute failure on driver, chip or luminaire.

**Reliability.** Minimum chip and driver failure rates of less than 1% for 6,000 hours, minimum lumen maintenance of 50,000 hours for L70/B50 criteria.

## VISION LIGHTING CONTROLS

---

The VISION range of lighting control products from TamLite Lighting, are designed to provide a flexible yet simple solution, so our customers can benefit from the latest energy saving technology.

The products are based around 4 main system types, and all offer a reliable, professional and easy to install solution. Furthermore, all the products are supported by our Field Sales team and Technical department who can provide advice on custom-made solutions for every application.
