- Notes:
- All luminaires used are subject to approval/certification of client/end user.
 - Emergency lighting has been designed in accordance with BS5266-1:2016 but is an indicative layout only - additional lighting may be required. All emergency lighting is to be checked and confirmed with a local building/fire control officer and ultimately approved by the owner of the building. As no firefighting equipment has been indicated on the drawings it is to be noted that a standard emergency layout only has been adopted, an increased level WILL be required if firefighting equipment is to be lit correctly.
 - This drawing is for schematic purposes only and installation shall fully comply with BS7671 (or National equivalent) and the installation instructions supplied with the product.
 - The ambient temperature assumed for this project is +25°C, should this not be the case on site, please ensure you advise us as the luminaires offered may not be appropriate.
 - We have utilised a maintenance factor of 0.8 for this project. Reflectance values have been assumed as follows unless otherwise stated:
(Office Type Interior): 70/50/20
(Warehouse Type Interior): 50/30/20
 - Final quantities are to be confirmed prior to an order/installation and we will not be held responsible for any errors or omissions.
 - Please ensure that this lighting scheme/layout complies with all requirements and if further details/calculations are required please contact us via the below details.
